SKILLS

Languages

Swift, JavaScript (ES6+), TypeScript

Frameworks & Platforms

iOS (UIKit, SwiftUI, watchOS), React Native, REST APIs, GraphQL

Architecture Patterns

MVC, MVVM, Clean Architecture

Databases

Firestore, SQLite, Core Data, DynamoDB

State Management

Redux, Zustand, Context API

Tools

Xcode, Android Studio, Cursor, VSCode, Windsurf, ChatGPT, Claude, GitHub, GitLab, Postman, Swagger, Amplify Studio(Basic),

Project Management

Zoho, ClickUp, Shortcut, Trello

Other

MixPanel, Customer.io, CI/CD,

SUMMARY

Results-oriented Mobile App Developer with 5 years of experience in **iOS (Swift)** and **React Native** application development. Skilled in building scalable, high-performance mobile apps with a strong focus on clean architecture, smooth UI/UX, and native integration.

- iOS (Swift):** Strong knowledge of iOS design principles, lifecycle management, Core Data, Core Animation, push notifications, localization, and watchOS development.
- React Native:** Proficient in core architecture, component-driven design, state management (Redux), navigation (Stack/Modal), native module integration, and advanced animations.
- Programming:** Experienced in **Swift, JavaScript**, and **TypeScript** with solid OOP fundamentals and design pattern implementation.
- Integrations:** Worked with **AWS Amplify, Firebase, Socket.io, FFmpeg, OCR, Agora, payment gateways** (Razorpay, HitPay, PayPal, EGH, IAP, Stripe), **Ticket Wallets**, and **social logins** (Google, Facebook, Apple).
- Additional Expertise:** Integrated **Google Maps** and **React Native Maps** for custom UIs, implemented CI/CD workflows, and managed full app deployment on the App Store and Play Store.

WORK EXPERIENCE

Sr. Software Engineer

Sep 2023 – Present

7Span

- Lead end-to-end mobile app development for **iOS (Swift/SwiftUI)** and **React Native** platforms.
- Architect clean, scalable, and maintainable solutions with **MVVM** and **Modular Architecture**.
- Collaborate with clients on planning, sprint reviews, and requirement gathering.
- Integrate analytics, cloud services, and third-party SDKs.
- Mentor junior developers and oversee App Store submissions.

iOS | React Native Developer

Jan 2021 – Sep 2023

Hyperlink Infosystem Pvt. Ltd.

- Delivered cross-platform mobile apps using **React Native** and **Swift (UIKit)**.
- Integrated **payment gateways, real-time chat**, and **Agora video calls**.
- Optimized app performance and implemented custom animations.

EDUCATION

MCA

June 2018 – June 2021

Gujarat University

BCA

June 2015 – May 2018

Gujarat University

PORTFOLIO

Livvy

Role: Sr. React Native Developer

Technology: React Native, TypeScript, Android, iOS

Contribution:

- Built complete event lifecycle: discovery, creation, invites, bookings, payments, tickets (QR scan/validation), and attendee management.
- Implemented multi-provider auth (Email/Phone, Google, Apple, Facebook) with secure token handling via Keychain.
- Structured app using feature-based architecture with TypeScript, React Query, and Redux Toolkit.
- Integrated maps, geolocation, and real-time updates via Socket.IO.
- Optimized performance with FlashList, memoized hooks, and Reanimated animations.
- Added Stripe Connect for provider monetization and payout flows.

Description:

A cross-platform mobile app that lets users discover, create, and join social events. It includes rich profiles, chat, favourites, invitations, bookings with **Stripe payments, QR-based ticketing and scanning**, and **map-based event discovery**, real-time notifications, reporting and feedback, plus a **provider portal** for managing availability, packages, members, and payouts—all built on a modern, high-performance **React Native** stack

Kinnect Club

Role: Sr. iOS Developer

Technology: iOS (SwiftUI), AWS Amplify

Contribution:

- Led the end-to-end development of a private storytelling platform for families.
- Integrated multimedia uploads (video, audio, text stories) using **AWS Amplify** storage.
- Implemented push notifications, in-app purchases, and analytics tracking.
- Managed a 3-member iOS team, sprint planning, and App Store deployment.

Description:

A private digital StoryBook app for families to share memories in invite-only groups, featuring an interactive “Echo” mode that sends daily questions for users to answer and share with their circle.

WAR94 App

Role: React Native Developer

Technology: React Native, Typescript, Android, iOS

Contribution:

- Built a social gaming app for players to join tournaments and interact through posts and stories.
- Developed premium subscription logic with multiple payment gateways.
- Implemented dispute and report modules for fair gameplay management.

Description:

A community gaming platform offering tournaments for games like PUBG, COD, and Counter-Strike, featuring social media functionality and secure payments.

ZyduS Frontline App

Role: React Native Developer

Technology: React Native, Android, iOS

Contribution:

- Built an internal app for ZyduS employees with ticket management and offline support.
- Integrated charts for visualizing tickets and performance reports.
- Designed and implemented chat and file attachment features.

Description:

An enterprise-grade mobile application for ZyduS employees to raise, track, and resolve service tickets with offline and analytics support.

Beat App

Role: React Native Developer

Technology: React Native, Typescript, Android, iOS

Contribution:

- Built a **short-video creation and sharing app** with real-time video and audio merging using **FFmpeg**.
- Implemented **custom media editor** supporting trimming, merging, and preview playback.
- Integrated **social authentication** (Google, Facebook, Apple) and user content profiles.
- Optimized video compression and rendering for faster uploads and seamless playback.
- Designed a modern UI for media browsing, engagement (likes/comments), and album creation.

Description:

A creative social platform where users can capture, edit, and share short video albums by combining clips, music, and effects—offering a smooth, high-performance experience powered by React Native and **FFmpeg**.

Greenfoot

Role: React Native Developer

Technology: React Native, Firebase, Android, iOS

Contribution:

- Created a carbon footprint tracker calculating user impact using OCR and API data.
- Integrated Google Maps and charts to visualize carbon reduction goals.
- Implemented vehicle info API for automated environmental data collection.

Description:

A sustainability app that measures and tracks carbon scores based on user lifestyle, helping users lower their environmental impact.

Ocean Platform (User & Provider Apps)

Role: React Native Developer

Technology: React Native, Typescript, Android, iOS

Contribution:

- Built an **end-to-end service marketplace platform** with separate apps for **customers and service providers**.
- Implemented **booking, rescheduling, and real-time chat** between users and providers.
- Integrated **payment gateways** (HitPay, Apple Pay, Google Pay) for secure and seamless transactions.
- Developed **map-based workflows** with **live tracking, shortest route algorithms**, and provider navigation.
- Added **rating, review, and dispute management** modules for post-service interactions.
- Enabled **authentication** via Google, Apple, and Facebook, along with Firebase-based notifications and data sync.

Description:

A complete on-demand home services ecosystem allowing customers to book, pay, and communicate with providers in real time, while enabling providers to manage jobs, routes, and earnings efficiently through dedicated React Native apps.

RxClick

Role: iOS Developer

Technology: iOS (Swift), Firebase

Contribution:

- Built an online pharmacy and telemedicine app with audio/video calling.
- Integrated Socket chat, Agora calls, and EGHL payment gateway.
- Designed modern animated UI for improved patient experience.

Description:

A telemedicine and pharmacy ordering app with chat, live consultation, and secure payment features.

Fit2Feet

Role: iOS Developer

Technology: iOS (Swift), Firebase

Contribution:

- Developed a footwear customization app using 3D model generation.
- Integrated Firebase Firestore for real-time user data sync.
- Added multi-language localization and custom API handling via Alamofire.

Description:

A mobile platform that lets users design and order personalized insoles and soles based on 3D foot models.
